INSIDE: Your one-stop source for suppliers of parking-related products and services

2015 PARKING BUYERS GUIDE & CONSULTANTS DIRECTORY
Join us in celebrating the “best-of-the-best” in the parking industry at the 2015 IPI Conference & Expo. From individuals to organizations, IPI recognizes the best and the brightest in our profession: the innovators, the role models, and the game-changers. Come see those who are truly changing the industry. For more information and submission packet materials, email chudoba@parking.org.

- World’s biggest parking conference with 230+ exhibitors
- 3,000+ conference attendees from more than 30 countries
- 60+ educational opportunities, including ShopTalks and PowerPitch forums
- Facility tours, latest technology demos, and informative sessions and keynotes
- Network and collaborate with colleagues

“The IPI conference has been a wonderful career boost. By far the best conference in so many ways!”

— Kathryn Hofer
Director, Norwalk Parking Authority
Among Best of 2014 Winners,
Parking Matters® Marketing & Communications Award

NOTE: GREEN VERTICAL BARS HIGHLIGHT GREEN AND SUSTAINABLE PRODUCTS/SERVICES
Parking professionals are asked to keep up with rapid-change new tools and technology designed to help us design, manage, and operate efficient and effective parking programs that are introduced all the time. The 2015 IPI Parking Buyers Guide & Consultants Directory is your comprehensive reference to finding suppliers, consultants, and other service providers who can help you keep up and make solid decisions.

The 2015 IPI Parking Buyers Guide & Consultants Directory is a printed guide and online reference (parking.org/ips)—search for equipment, suppliers, and consultants from your computer, tablet, or smartphone. Whether at your desk or in the field, we hope this reference will offer value throughout the year.

For those seeking face-to-face direct contact and conversations with potential suppliers and consultants along with hands-on demonstrations of new products and technologies, plan now to attend the world’s largest parking exposition. The 2015 IPI Conference & Expo will be held in Las Vegas, June 29–July 2, 2015. It’s a perfect venue to explore the latest in parking equipment and technology and trends, talk with industry experts and colleagues about new ideas and new approaches, and stay up-to-date on all things parking. Visit IPIConference.parking.org for information and to reserve your spot.

I hope this reference serves as a valuable tool for you and your team all year, and hope to see you in Las Vegas!

Shawn Conrad, CAE

Looking For Products That Will Last?
Innoplast specializes in products that help protect and improve facilities and parking garages. Products like BollardGard bollard covers, clearance bars, speed bumps and column protectors help warn drivers and reduce the amount of maintenance and repairs that would typically need to be done. These items are made with strong, durable materials that will last a long time and are either made from recycled material or are recyclable at the end of their use.

Ameristar Booth & Building Structures

Your Custom Security Printer Since 1898
Our complete line of stickers (interior & exterior), hang tags, scratch-off/temporary permits, & repositionable stickers will fill your requirements. Our specialized technologies in high security printing give your enforcement staff ways to detect counterfeited permits. Bar coding speeds up your registration lines; RFID or magnetic striping will also allow the hang tag to serve as your gate card. PERMIT DIRECT—let WW&L & T-2 Systems print, control & distribute permits for your program.

Warrendale, PA 15086
724.772.2400; Fax: 724.772.3664
www.hubparking.us; info.us@hubparking.com

Lane Entry Stations
HUB Parking Technology brands, ZEAG and DATAPARK, provide Lane Entry Stations/Ticket Dispensers that dispense mag-stripe or barcode tickets. Transaction and lane data is encoded and printed on the ticket including ticket number, entry date and time, entry lot and lane. They can be programmed to accept credit card upon entry for prepayment or credit card in/credit card out functionality. The station can securely verify the validity of contract parking cards.
T2 Systems, Inc.
8900 Keystone Crossing

www.t2systems.com; info@t2systems.com

T2 Entry Station
T2 entry stations use standard credit card size ticket stock and the unit can feed, cut, encode, print and issue a ticket in less than 2 seconds. The dispenser supports a variety of loop configurations to fit various applications and audit requirements. All transaction information—including time, date, sequence number, entry lane and site number—is immediately fed into T2 Flex software. The unit can be paired with the T2 Automated Pay Station and/or T2 Cashier Station for a complete Access and Revenue Control solution.

Providing Validation Solutions for the Parking and Transit Industries.
How do you get your next big idea, business idea, product, start-up, or cutting-edge small business in front of experts who can advise, invest, or help you develop your innovation?

Fashioned after the popular American TV show “Shark Tank,” IPI’s Park Tank™ is your chance to pitch an idea for a parking-related product or service to a panel of parking experts, including representatives from large municipalities and venture capitalists.

This is the deal:

- No idea is too large or too small.
- Open to all — start-up companies, new exhibitors, and entrepreneurs.
- If your idea makes the cut, pitch it live onstage at the 2015 IPI Conference & Expo to our sharks (judges).
- If your idea outranks the rest, win recognition and valuable exhibit and advertising space (a $4,000 value).
- Apply online today: Slots are very limited and competition is fierce.

To apply, visit: ipiconference.parking.org/parktank.cfm

Vehicle Detection Sensors
IPS vehicle detection sensors provide a highly reliable system to detect the presence/absence of a vehicle in a parking space. IPS sensors communicate directly to IPS meters rather than via a mesh communication network, providing the most reliable communication transmission available at a significantly lower cost. Sensors provide cities with valuable real-time data on occupancy and more via our Data Management System, supporting both maps and smartphone applications.

Improve Customer Service, Enhance Revenue Collection
We lead the way in municipal parking and photo enforcement violation processing and collection services. We offer a state-of-the-art comprehensive menu of parking management consulting services for organizations of all sizes. We enable the use of electronic payment systems (EPS) technology, such as smart cards and AVI for fee collection at off-street facilities. We are experts in public and private parking operations and can help parking agencies, owners and operators develop policies, procedures and organization.
Ideas for Parking. Solutions for People.

Today, more than ever before, parking requires an in-depth understanding of varied disciplines, from architecture to structural and mechanical engineering, to traffic design, operations, renovation and preservation. But at Carl Walker, everything begins by listening and responding to people, because our goal is not only to create parking and engineering solutions of lasting value, but also to provide innovative solutions that can streamline and simplify their lives. Over the years, our parking professionals have been responsible for thousands of successful projects nationwide, and the countless satisfied people who have parked in them.

Reviewing, Analyzing, Creating, Improving & Refining

As a multi-disciplined full-service parking design, restoration and planning firm, O&S Associates is dedicated to providing services in a responsive and professional manner to meet and exceed client expectations. O&S Associates offers comprehensive design services including architectural, functional and structural design supported by complete construction administration services. Complementing these services, our restoration engineering services include conditions appraisals, material testing, cost estimating, construction documents and construction administration. Our full service planning division offers all services to meet your study and planning needs.

Quality Design With a Creative Edge

The Parking Garage Division of Reigstad & Associates provides full service parking consulting including parking analysis, functional/conceptual design, project coordination, wayfinding/signage, as well as construction administration and project management. We can serve as the prime consultant for your parking needs and will form a team to design your project. We believe this approach provides a ‘turnkey’ solution with a focus on timely delivery while addressing budget constraints.

Structural Engineering—Parking Structures, Building Façades, Plazas
Carl Walker’s structural engineering consulting services are the foundation we’ve built our reputation on for the past 30 years. It starts with the comprehensive engineering expertise we provide for parking structures, but it also extends to a diverse selection of other services. From structural design and construction administration for other building types, expansions and bridges, to special consulting services related to long term durability, analysis, strengthening and forensics, we offer a wide range of structural services to meet our client’s needs.

Functional, practical, and profitable parking solutions.
Integrating parking consulting expertise with structural, diagnostic, civil, and traffic engineering services, WALTER P MOORE provides more than 30 services that encompass all phases of a parking project—from feasibility to master planning, project management, design, construction administration, and operational consulting. Employing this integrated, lifecycle approach allows us to engineer solutions that are cost-effective, resource-efficient, and user-friendly, which for owners, operators, and communities means increased revenue, safer facilities, improved access and circulation, and decreased operating and maintenance costs.
Raving Fans Drive Higher Profits
Parking operators can improve revenue and audit control for sporting events, concerts, and expos with T2 PermitNow. T2’s solution allows parking managers to go where gates can’t by accepting cash or credit card payments with T2 handhelds, or use handhelds in the lane to speed up ingress into gated facilities during events. Customers can also presell permits online and gain insight into event parking revenue and resource needs, which helps to speed up entry traffic—and turns parking patrons into raving fans.

**Restoration and Preservation Solutions**

Properly evaluating a structure to determine the location, extent and cause of distress and/or deterioration in structural and waterproofing systems is essential to developing an effective repair and maintenance plan. The Evaluation/Condition Assessment includes visual and hands-on review of a structure and its components. Recommendations for repair, as well as the associated opinion of probable construction cost, are presented to the Owner to allow for the development of a budget and potential phasing plan. Our team of dedicated Restoration Specialists brings their depth of experience to each job and utilizes a variety of destructive and non-destructive testing methods in their approach to evaluate a structure.

*Ideas for Parking. Solutions for People.*

Functional design of a parking structure is a complex art and science. The needs and goals of every user group and owner can be quite different. One size does not fit all. Carl Walker provides customized design services that focus on creating a sustainable facility while optimizing parking layout efficiency, ramping systems, ingress/egress, queuing, vehicular flow, user comfort factors and safety. Great functional design is the primary key to the success of any parking structure.

*Efficiency and Cost Control Through Design*

Our design goal is to balance architectural design with efficient functional design. This objective is achieved through efficient parking layout dictated by the most suitable and economical structural system. Blending these two design elements, the O&S Associates' design team is able to offer functional designs that safely integrate vehicular and pedestrian traffic flow. O&S Associates augments these design characteristics with effective wayfinding, floor identification signage and revenue control and access systems.

*Preventative Maintenance Extends Structure Life*

An effective Repair and Preservation program must do more than just address the repair needs of the building or structure. It must also be balanced with the desired service life, as well as fit within budgetary and operational constraints. The development of a Preventive Maintenance Plan extends the service life of the structure. The intent is to minimize future major repairs by identifying and scheduling ongoing repairs and protective waterproofing. Carl Walker’s team of dedicated Restoration Specialists bring their depth of experience to each project and help clients establish long-term maintenance programs for their structures.

Unlock the Value of Your On-Street Parking Assets

With cities seeking ways to reduce operating expenses and find innovative ways to close growing budget deficits, a managed services model can maximize the value of a city’s on-street parking program while allowing the city to retain policy control. Duncan provides Parking Management Services to suit your objectives and requirements, and will work with you to determine a contractual and operational model to support the policy and strategic objectives of the City.

*Improve the Return on Your Parking Investment*

A parking master plan can provide the data and alternatives analyses necessary for determining system needs no matter your supply/demand situation; it can help support your decisions to add parking spaces, adjust operational strategies, improve overall system management, and/or quell community concerns about perceived parking shortages. Our project approach includes a detailed analysis of on-street and off-street market conditions including parking supply and demand, operational methodologies, system management, signage and wayfinding, zoning, and current parking-related policies and procedures. The result is a pragmatic parking plan that incorporates industry best practices customized to address community needs.

*Master Planning for Parking and Mixed-Use*

TimHaahs’ team of professionals includes planners, architects, designers and engineers who understand that planning early for parking is the best strategy for a successful project. Parking is not about cars, but people; creating vibrant, attractive “people places” is essential to the success of any new development or revitalization effort. Our goal is to integrate parking early in the overall master planning process, integrating safe and convenient parking with all destinations.

Employing this integrated, lifecycle approach allows us to engineer solutions that are cost-effective, resource-efficient, and user-friendly, which for owners, operators, and communities means increased revenue, safer facilities, improved access and circulation, and decreased operating and maintenance costs.

INTRODUCING
IPI’S NEWEST ONLINE COURSE.

Sustainability in Parking
$89 for IPI members* | 2 Hours (Self-paced: Start, stop, exit, return)
Course credits: 2 CAPP points, 2 CEUs

Sustainability in Parking provides essential background on how parking professionals can support the triple bottom line (people, planet, and profit) through environmentally-sensitive approaches to design, operations, and management. The course outlines systems for achieving higher performing assets and greater sustainability using environmental best practices, and is based on IPI’s Framework on Sustainability, and the Green Parking Council’s Green Garage Certification Standard.

Each course earns you CAPP points and CEUs. Want to learn more? Go to parking.org/onlinecourses

An easy way to advance knowledge and skill sets in the parking profession.

Taking an International Parking Institute online course is the best way to enter, advance, and excel in the evolving parking profession. Affordable and self-paced, these courses have been designed to provide essential information in an easy-to-follow format. Train your entire staff. Seven courses are now available with more on the way.
MARK YOUR CALENDAR & TAKE YOUR CAREER TO THE NEXT LEVEL.

CAPP
Respected worldwide as the leading credential in parking

Save the date, mark your calendar, and get registered today. Every course earns valuable CAPP points for certification and recertification. But these courses are designed for all parking professionals, not just those interested in CAPP.

Registration details at parking.org.

Building owners and facility managers want to provide safe and effective parking garages while minimizing the energy costs associated with HVAC. Macurco Gas Detection helps engineers, integrators and installers to provide suitable gas detection and control systems for enclosed parking garages and other commercial gas detection and ventilation applications.

Detection products for Carbon Monoxide (CO), Nitrogen Dioxide (NO2), Natural Gas, Propane and other Toxic & Combustible Gases

Manufactured by Aeronics, Inc.
